

## Enterprise Begins Open Season for ATEX Ethane Pipeline

August 26, 2019

HOUSTON--(BUSINESS WIRE)--Aug. 26, 2019-- Enterprise Products Partners L.P. (NYSE: EPD) ("Enterprise") today announced the start of a binding open season to determine demand for expanded capacity on the partnership's Appalachia-to- Texas ("ATEX") ethane pipeline. The 1,200-mile ATEX pipeline transports ethane from the Marcellus/Utica Basin of Pennsylvania, West Virginia and Ohio to Enterprise's natural gas liquids storage complex in Mont Belvieu, Texas, and features pipeline access to petrochemical plants along the Gulf Coast.

Subject to sufficient customer commitments during the open season, Enterprise would add up to 50,000 barrels per day of incremental capacity through a combination of pipeline looping, hydraulic improvements and modifications to existing infrastructure. The expanded capabilities would be in service by 2022.

The open season begins at 9 a.m. CDT on August 26, 2019 and continues until 5 p.m. CDT on September 25, 2019. For commercial inquiries or additional information related to the open season, please contact Shane Sullivan at (713) 381-6550 or [spsullivan@eprod.com](mailto:spsullivan@eprod.com).

Enterprise Products Partners L.P. is one of the largest publicly traded partnerships and a leading North American provider of midstream energy services to producers and consumers of natural gas, NGLs, crude oil, refined products and petrochemicals. Our services include: natural gas gathering, treating, processing, transportation and storage; NGL transportation, fractionation, storage and import and export terminals; crude oil gathering, transportation, storage and terminals; petrochemical and refined products transportation, storage and terminals; and a marine transportation business that operates primarily on the United States inland and Intracoastal Waterway systems. The partnership's assets currently include approximately 49,200 miles of pipelines; 260 million barrels of storage capacity for NGLs, crude oil, petrochemicals and refined products; and 14 billion cubic feet of natural gas storage capacity.
